

REIMAGINING VOCATIONAL EDUCATION

Vocational education will be integrated in the school curriculum in a phased manner.

Beginning with vocational exposure at early ages in middle and secondary school, quality vocational education will be integrated smoothly into higher education.

This will ensure that every child learns at least one vocation and is exposed to several more.

Bagless Days & Fun Courses

Children will be given periodic exposure to activities outside school.

During Grades 6-8, every student will take a fun course that gives a survey and hands-on experience of a sampling of important vocational crafts.

All students will participate in a 10-day bagless period sometime during Grades 6-8 where they intern with local vocational experts such as carpenters, gardeners, potters, artists, etc.

Internship opportunities to learn vocational subjects will be provided in Grades 6-12, including holiday periods.

Vocational courses through online mode will also be made available.
